The Trenchless Industry Directory is an easy-to-use, highly selective, and human-edited collection of links, providing targeted online traffic to businesses in the Trenchless industry. This web directory features contractors specialize in sewer repair and rehabilitation using trenchless pipe replacement methods, such as pipe bursting and pipelining. The directory also includes specialized underground contractors who provide horizontal directional drilling and boring, micro-tunneling and other trenchless methods to install underground piping and conduits. The Trenchless Industry Directory also includes equipment manufacturers and suppliers, industry associations, educational resources, and related services. Trenchless technology is a type of subsurface construction work that requires few trenches or no continuous trenches. It is a rapidly growing sector of the construction and civil engineering industry. It can be defined as "a family of methods, materials, and equipment capable of being used for the installation of new or replacement or rehabilitation of existing underground infrastructure with minimal disruption to surface traffic, business, and other activities.
