MBMI deals with pre-engineered and pre-fabricated metal buildings, metal carports, storage buildings. Their metal structures have withstood hurricanes, fires, and earthquakes over the years. Their staff comprises engineers, drafting technicians, detailers, and designers with over 40 years of experience in the metal building manufacturing industry. They have the experience and know-how to put together the highest quality steel building kit in the metal industry. MBMI prefab metal buildings meet and surpass all the codes and loads for any location throughout the world.
