Interior Design Solutions (IDS) is a North American Master Distributor of Belbien Architectural Finishes and 3M Fasara & Scotchcal Glass Finishes. All of their architectural finishes can transform the look and feel of interior and exterior spaces at a fraction of the cost of other building materials. Belbien™ is a versatile architectural finish which can be installed in many places such as casinos, restaurants, hotels, cruise ships, and more. Belbien offers over 430 patterns which can be used to complement and substitute materials like brushed metals, stone, wood, leather, and other visually appealing materials. Since Belbien is a vinyl film with a pressure-sensitive adhesive, it can be installed on flat or curved surfaces and both indoors and outdoors. A professional team is available to answer questions and make recommendations based on the scope and details of the project.
