The Construction Education Foundation of Georgia helps to support and facilitate training programs for the construction industry in Georgia. Headquartered in Lawrenceville, Georgia, CEFGA identifies high schools and technical colleges with existing construction training programs, and works with these schools to accredit their programs and to ensure that students are learning relevant skills from qualified industry-certified trainers. CEFGA also facilitates job site tours, summer internships, and career-related events. The CEFGA accreditation and teacher training programs are defined on its web site, and accredited programs may be located online.
