

Cali Bamboo, LLC

6675 Mesa Ridge Road, Suite 100
San Diego, California 92121
United States

Phone: (888) 788-2254

Cali Bamboo LLC makes flooring, fencing, composite decking, and plywood made from bamboo and provides installation and maintenance services. Cali Bamboo serves customers in the State of California. The company specializes in using bamboo as a sustainable building product. The company is based in San Diego, California. To bring authentic California coastal style with eco-friendly alternatives. We believe in innovating better ways to create products with an uncompromising dedication to quality, responsible design, and craftsmanship. As bamboo can regenerate in a fraction of the time it takes traditional lumber to mature, its use as an alternative to less sustainable wood products makes bamboo an ideal green building solution. Founded in 2004, Cali Bamboo offers bamboo, eucalyptus, cork and reclaimed flooring, bamboo fencing, plywood, poles, slats, palm thatch, and cork wall tiles. Products may be ordered from the company's website, and a list of local dealers is also published, along with an installation guide, photographs, video, and project highlights.
